

Building on Momentum

We have a unique opportunity to build on the National momentum of the awakening of the **American Patriot**. The hard working men and women of this country have finally started to fight back. Socialism is rearing it's ugly head in every headline we are accosted with. There is so much at stake it is difficult, if not physically impossible to keep up with it all. The man currently holding the title of POTUS has just concluded a multi-continent taxpayer funded APOLOGY campaign for the "arrogant and dismissive, even derisive" attitude of all before HIMSELF.

Our work load as Republican women has tripled in just the last three months. We must reach down in the depths of our souls and find the energy and will to fight this battle. We must prevail, we must replace those in Washington that continually show weakness and deference to the likes of Hugo Chavez, Fidel Castro, and other world despots, dictators and America haters! We must also replace those elected officials who constantly condescend to those of us who will not stand for this shameful behavior from those duly sworn to defend our Constitution.

We must pray for guidance and courage and take back our United States of America.

**Respectfully,
Your newly elected Right Wing Extremist!
Susan Johnston, Tea-Partier**

P.S. To all those who worked so hard to make the Rogers Tax Day Tea Party the 500+ turnout that it was...THANK YOU!
